

YEAR IN REVIEW

For the seventh consecutive year, the total dollars wagered on all charitable gaming activities declined. During the 2000-2001 reporting period, total charitable gaming dollars wagered (\$259,322,841) decreased 2.27 percent from the previous reporting period, and declined by 36.5 percent when compared to its peak year in 1994 when wagering reached \$408,222,880.

Wagering on bingo and pickle cards decreased during the reporting period while wagering on county/city lottery (keno) and lottery/raffle increased for the same period. As was the case in the previous six reporting periods, pickle card sales showed the largest decline, down 13.85 percent. Bingo continued the decrease started in 1994 with a further decrease from last year of 6.98 percent. Lottery/raffle activity is at an all-time high and increased by 11.21 percent from last year. County/city lottery wagering increased for the third year in a row with an increase of 3.98 percent over last year. However, as a result of the overall decline in wagering, gaming tax revenues were also down this reporting period (3.42 percent) when compared to last year.

The availability and variety of casino gambling in Iowa and other bordering states continue to be one of the major contributing factors to the decline in Nebraska's charitable gaming wagering. Additionally, the ongoing in-state use of illegal video gaming devices continues to have a negative effect on legitimate charitable gaming operations in Nebraska.

Total Gaming Dollars Wagered – \$259,322,841

Total Gaming Tax Revenue – \$5,671,765*

* Based upon tax returns filed; actual tax revenue received was \$5,669,186.
